Electric Heat Rate

Sub-Metered Electric Heat Rate 8

All heat kWh's are billed at 5.3 cents per kWh from September to April for all accounts. This rate is 5.8 cents per kWh or 47% lower than the general service rate.

Material and installation cost may be financed over 6 months with no interest added. This amount will be added to your monthly bill.

Sub-Metered Financed Electric Heat Rate 7

All heating kWh's are billed at 6.9 cents per kWh from September to April for all accounts. The 1.6 cent difference between this rate (7) and the regular heat rate (8) will be applied to the cost of the metering material and installation. When the installation cost is recovered, the heat rate will be reduced to the standard heat rate.

Sub-metering material is available from West River Electric at cost plus tax.

Metering must be installed by a South Dakota licensed electrician.
